What Does This Privacy Policy Cover?

This User Policy covers the treatment of personal data ("**Personal Information**") gathered when you are using or accessing the Services. This User Policy also covers our treatment of any Personal Information that our business partners (third parties like usage tracking tools to check the usage, communicate with our Users and improve the scenarios of the Services) share with us or that we share with our business partners.

This User Policy does not apply to the practices of third parties that we do not own or control, including but not limited to any third party websites, services and applications ("**Third Party Services**") that you elect to access through the Service or to individuals that we do not manage or employ. While we attempt to facilitate access only to those Third Party Services that share our respect for your privacy, we cannot take responsibility for the content or privacy policies of those Third Party Services. We encourage you to carefully review the privacy policies of any Third Party Services you access.

In addition, a separate agreement governs delivery, access and use of the Services (the "**Service Provider Agreement**") and the processing of Customer Data.

What Information Do We Collect and Receive?

The information we gather enables us to personalize, improve and continue to operate the Service. In connection with certain aspects of the Service, we may request, collect and/or display some of your Personal Information. We collect and receive Data and other information in different ways:

- **User Data or Account Information.** Authorized Users routinely submit User Data to Launchmetrics when using the Services.

An Account can either be created by us or a user on your end, for this you will provide us information that could be Personal Information, such as your **username, password, email**

address, title, timezone and telephone number. You acknowledge that this information may be personal to you, and by creating an account on the Services and providing Personal Information to us, you allow others, including us, to identify you and therefore may not be anonymous. We may use your account information to send you operational information about our Services. We automatically receive and record information from your web browser when you interact with the Services, including your IP address and cookie information.

Generally, the Services automatically collect usage information, such as the number and frequency of visitors to the Services. We may use this data in aggregate form, that is, as a statistical measure, but not in a manner that would identify you personally. This type of aggregate data enables us and third parties authorized by us to figure out how often individuals use parts of the Services so that we can analyze and improve them.

- **Log Data**

As with most websites and technology services delivered over the Internet, our servers automatically collect information when you access or use our Services and record it in log files. This log data may include the Internet Protocol (IP) address, the address of the web page visited before using the Services, browser type and settings, the date and time the Services were used, information about browser configuration and plugins, language preferences and cookie data.

- Detecting or preventing fraud, and unauthorised access;
- Help Users and address their needs while using the platform;
- Help Users to know who did what and when on their Account;
- Keep track of a reliable User point of contact among Customer Accounts and obtain information as soon as a contact is leaving;
- Keep improving our product in terms of features scope and security needs.

You will be able to define a log data "retention period". Based on your setting, logs will be automatically deleted if older than the period of time selected. Additionally, certain Users with the right privileges, have the ability to manually delete logs.

- **Device Identifiers**

When you access the Services by or through a mobile device (tablets only), we may access, collect, monitor and/or remotely store one or more "device identifiers," such as a universally unique identifier. Device identifiers are small data files or similar data structures stored on or associated with your mobile device, which uniquely identify your mobile device. A device identifier may be data stored in connection with the device hardware, data stored in connection with the device's operating system or other software, or data sent to the device by us. A device identifier may convey information to us about how you browse and use the the Services. This device identifier may remain persistently on your device, **for 24 hours**, to help you log in faster and enhance your navigation through the Services. You may also use the *remember me* feature that will enable you to easily access to the Services. Such identifier is kept **for 14 days**.

We collect statistical information about how both unregistered and registered users, collectively, use the Services ("**Aggregate Information**"). Please note that if you use your browser settings to block all Cookies (including strictly necessary Cookies) you may not be able to access or use all or parts or functionalities of our Services.

If you want to remove previously-stored Cookies, you can manually delete the Cookies at any time. However, this will not prevent the Services from placing further Cookies on your device unless and until you adjust your Internet browser setting as described above.
